# THE 2000 TREASURE HUNT

Thank you for participating in the 50<sup>th</sup> consecutive annual edition of the Treasure Hunt in the Valley of the Sun. This year's committee sincerely hopes that you had an enjoyable experience.

Each year, the top three "amateur status" teams are recognized at the post-hunt banquet. In addition to this, the performances of some other teams, including "professional status" teams and novice teams may be recognized.

The prizes awarded the winners over the years have had little monetary value, yet the competition for first place remains spirited. The red hunting caps awarded Treasure Hunt winners have become prized possessions in many trophy cabinets. Each winner earns the fleeting privilege, and immense responsibility, of serving a three-year term on the Treasure Hunt Committee. Traditionally, each winner has also earned one "free" post-committee-service hunt.

Motorola has been a long time sponsor of the Treasure Hunt. The 2000 Committee believes that it is important to recognize the contributions of Motorola to the success of this event over the years.

This is a rough one for the Tic-Tac-Toe experts. Crossword puzzle artists fare much better. The right way to “word” this panel is:

T	W	O
S	I	X
O	N	E

This of course all adds up to Circle <sup>9</sup>. FYI, this clue is of historical interest for all you long term treasure hunters, having first appeared in The Hunt of 1953. Note the HWOW: Old clues are good clues.

Circle <sup>9</sup> is located in map grid B-3. From the intersection of 7<sup>th</sup> Ave. and Joy Ranch Road, proceed north on 7<sup>th</sup> Ave. for 0.275 miles. The clue site is located 275 feet west of 7<sup>th</sup> Ave. behind a desert tree.

**IF YOU ARE UNABLE TO LOCATE CLUE B, OPEN EMERGENCY SOLUTION ENVELOPE 18, WHICH WILL DIRECT YOU TO CLUE C.**

**THIS IS CLUE B. SOLVING THIS CLUE WILL LEAD YOU TO CLUE C.**

*Clue B is a working visual consisting of a spinnable wheel with a stationary arrow indicator on top.*

*No matter how the wheel is spun, it always stops in the orientation shown.*

**IF YOU ARE UNABLE TO SOLVE THIS CLUE OR FIND CLUE C, OPEN EMERGENCY ENVELOPE 18, WHICH WILL DIRECT YOU TO CLUE C.**

**THIS IS EMERGENCY SOLUTION 18, WHICH WILL LEAD YOU TO CLUE C.**

All the computer literate hunters should recognize the key people who helped start the personal computer industry. The wheel portrays Steve “Woz” Wozniak, Paul Allen, Steve Jobs, and Bill Gates. Spinning the wheel always leaves Wozniak on top or “up”. Hmmm...you could say “Woz-up” or “whassup” as in

the recent Budweiser beer commercials. So head over to the circle with a beer mug  at Bud Lane and Commercial Court.

Circle  is located in map grid D-3. From the intersection of 16<sup>th</sup> St. and Joy Ranch Road, proceed east on Joy Ranch past 20<sup>th</sup> St. The clue site is located 0.16 miles east of 20th St. and 105 feet north of Joy Ranch behind a mesquite tree.

**IF YOU ARE UNABLE TO LOCATE CLUE C, OPEN EMERGENCY SOLUTION ENVELOPE 1, WHICH WILL DIRECT YOU TO CLUE D.**

**THIS IS CLUE C. SOLVING THIS CLUE WILL LEAD YOU TO CLUE D.**

#### Four Clue Sites

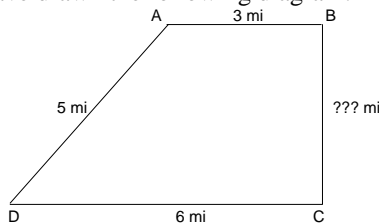

Under a bright golden moon, there are four clue sites named A, B, C, and D. The distance from site A to site B is 3 miles. The distance from site D to site C is 6 miles. The distance from site A to site D is 5 miles. The road from site A to site B runs parallel to the road from site D to site C. The roads from site A to site B and from site B to site C form a right angle. The roads from site B to site C and from site C to site D also form a right angle.

What is the distance traveled in miles if you follow the roads to all the sites, starting and ending at the same site without retracing? The distance is the number of your next clue site.

**IF YOU ARE UNABLE TO SOLVE THIS CLUE OR FIND CLUE D, OPEN EMERGENCY ENVELOPE 1, WHICH WILL DIRECT YOU TO CLUE D.**

**THIS IS EMERGENCY SOLUTION 1, WHICH WILL LEAD YOU TO CLUE D.**

Based on the given information you should have drawn the following diagram:

Traveling the roads through all the sites, starting and ending in the same place, indicates a perimeter measurement is required; however, the distance from B to C is unknown. To find BC, draw a line from A perpendicular to DC. This line will be the same length as BC since angles ABC and BCD are right angles. Using the Pathagorean Theorem on the right triangle just formed gives:

$$AD^2 = (DC - AB)^2 + BC^2 \text{ or } 25 = 9 + BC^2 \text{ or } BC^2 = 16 \text{ or } BC = 4.$$

So the perimeter is  $5 + 3 + 4 + 6 = 18$ , your next site. Take a drive to Circle **18**.

Circle **18** is located in map grid I-4. From the intersection of Cave Creek Road and the Carefree Highway, proceed northeast on Cave Creek for 1.65 miles to Surrey Drive. Turn west onto Surrey and proceed 0.25 miles to where it ends in a cul-de-sac. The clue site is located behind the transformer box at the west edge of the cul-de-sac.

**IF YOU ARE UNABLE TO LOCATE CLUE D, OPEN EMERGENCY SOLUTION ENVELOPE 23, WHICH WILL DIRECT YOU TO CLUE E.**

Ordinary looking fraction sequence? Not exactly. There is no real relevance to the fractions shown until you convert them into decimal form. The sequence now looks like: 0.15, 0.28, ?, 0.36, 0.396. HWOW "1040. Money is such a [taxing] subject." should have got you thinking about taxes and possible tax brackets. The four rates shown, when viewed as percentages (15%, 28%, 36%, 39.6%) provide the

clue to the missing one. The missing tax rate, of course, is 31% (0.31). Go to Circle  $\frac{341}{1100}$  which is the fractional equivalent of 31%.

Circle  $\frac{341}{1100}$  is located in map grid J-1. From the intersection of Cave Creek Road and School House Road, proceed north on School House for 1.45 miles to Fleming Springs Road. Turn northeast onto Fleming Springs and proceed 0.1 miles to Lone Mountain Road N. Turn east onto Lone Mountain and proceed 0.45 miles to Echo Canyon Road. Turn north onto Echo Canyon and proceed 0.2 miles to a wash. The clue site is located 102 feet southwest of Echo Canyon in the center of the wash near a dead tree.

Circle (CS) is located in map grid L-6. From the intersection of Scottsdale Road and Westland Drive, proceed east on Westland for 1.0 miles to Hayden Road. Turn south on Hayden and proceed 0.25 miles to Smokehouse Trail. The clue site is located 131 feet east of Hayden and 80 feet north of Smokehouse near a saguaro cactus.

Noting the tracks made by the pieces during the 10 moves specified will produce the fraction  $\frac{7}{4}$  as shown to the right. So play like king of the road and move on

over to Circle  $\textcircled{1.75}$  (the decimal representation of  $\frac{7}{4}$ ) and see if you can lay a check mate on the next clue.

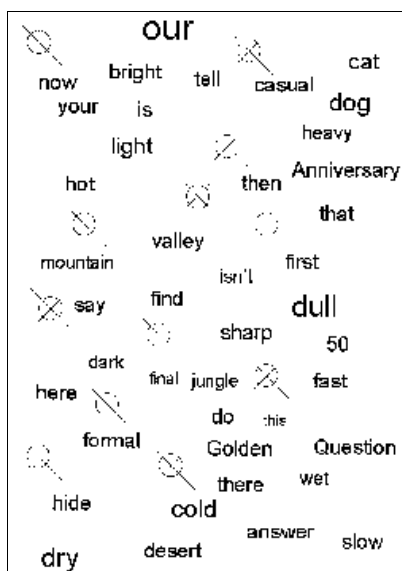

HWOW: “Know your moves, don't get caught with your *en passants* down.”

Circle  $\textcircled{1.75}$  is located in map grid P-3. From the intersection of Pima Road and Cave Creek Road, proceed northeast on Cave Creek for 3.4 miles to Carefree Way. Turn east onto Carefree Way and proceed 0.15 miles to where it turns south and becomes Boulder View Drive. Proceed south on Boulder View for 0.9 miles to where it dead-ends at a barricade. The answer to this clue was transparent. We hope your team won the fastest-finger round and reached for the transparency in your brown bag:

Carefully overlaying the transparency on the clue revealed that five of the symbols were precisely-matching registration marks. The words that appeared on the line were “is” “that” “your” “final” “answer”. Well, there’s no need to phone a friend! “Is that your final answer?” is the catch phrase to

Who Wants to Be a Millionaire? So, head your team over to Circle **(abc)**, near Millionaire Lane and Regis Road.

Circle **(abc)** is located in map grid N-4. From the intersection of Pima Road and Stage Coach Pass, proceed 1.0 miles east on Stage Coach Pass to where it becomes a dirt road at a large walled compound south of the road. The clue site is located at the southeast corner of the walled compound.

The HOWW “You must be able to MAGNIFY the minute” should have convinced you, Sherlock, to bring a good magnifying glass. Using that magnifier, you will see some tiny letters all jumbled about. Unscrambling the letters forms the word “soft”. It looks like a micro “soft” has been broken up, hinting of

the proposed break-up of Microsoft Corporation. So head on over to the broken window circle  near Greedy Gates Drive.

 Circle (Broken Window) is located in map grid N-9. From the intersection of Pima Road and Dynamite Blvd., proceed east on Dynamite for 0.6 miles to 93<sup>rd</sup> St. Turn north onto 93<sup>rd</sup> St. and proceed north then northeast 0.5 miles to a dirt road. Turn north onto the dirt and proceed 0.1 miles to an intersection with another dirt road. The clue site is located 78 feet north and 110 feet east of this intersection next to a palo verde tree.

HWOW says “Be much more clever than your teammates and they may give you the boot”. Boot disk, that is. This is a hint for you to boot the PC found at the clue site with the floppy disk that you find in your Brown Bag. Upon booting, the hidden executable prints “Circle 2<Letter of this clue>” on the screen. Because this is clue K,  $2K = 2048$ , so rush on over to Circle <sup>2048</sup>.

For those of you clever enough to boot the disk on your private laptop in your van, the program types: “New area code #1 + New area code #2”. Recalling immediately that two new area codes (623 & 480) were introduced into the Valley last year, you will rush over to Circle 1103. Unfortunately, you were TOO clever and found a Jackass site. But hold that floppy disk up with your laptop proudly while a Wizard snaps a great photo so that your teammates can always remember how clever you were!

Circle <sup>2048</sup> is located in map grid O-12. From the intersection of Pima Road and Pinnacle Peak Road, proceed east on Pinnacle Peak for 1.55 miles to where it turns sharply to the north. Continue on Pinnacle Peak for another 0.8 miles to a cul-de-sac where the road turns to dirt at a rock barricade. This clue was a test of your powers of observation. The astute Hunters will have noticed that some letters were not like the others – they were italicized and not bolded. Stringing them together gave the advice “every fourth syllable twice”.

Upon taking every fourth syllable the first time, your team got the cryptic observation: “now you are going well in to the clue this circus will cycle till you come leading back”. Taking every fourth syllable

once again (twice, in all), the solution is revealed as “go to circle lead”. So, lead on over to Circle

All you Treasure Hunters should immediately recognize the chemical formula for Iron Pyrite, or Fools Gold. But don't be fooled -- there is no deeper hidden meaning here. Don't forget that HWOW says to "Remember your Periodics".

Rush on over to the Circle  $\text{Au}$ , near the intersection of April Avenue and 1<sup>st</sup> Street.

Circle  $\text{Au}$  is located in map grid H-10. From the intersection of Tatum Blvd. and Jomax Road, proceed east on a dirt road for 0.1 miles. The clue site is located 95 feet north of the dirt road, behind a palo verde tree.

**IF YOU ARE UNABLE TO SOLVE THIS CLUE OR FIND CLUE Q, OPEN EMERGENCY ENVELOPE 2, WHICH WILL DIRECT YOU TO CLUE Q.**

**THIS IS EMERGENCY SOLUTION 2, WHICH WILL LEAD YOU TO CLUE Q.**

There are two ways to solve this clue. The first way is to press your finger up against the glass next to the steel ball and, using your magnetic personality, levitate the ball up to where it simultaneously touches the two wires. For most engineer types, whose personalities are only useful as an effective means of birth control, this will not work.

The historical chart in HWOW hints at the real solution: "Bring a nine volt battery". Construct an electromagnet out of 1) the wire in the brown bag, 2) the 9V battery clip from the brown bag, 3) the nail you should've purchased in line, and 4) the 9V battery you should have with you per the HWOW. Using the electromagnet to pull the ball up to the wires will complete a circuit that illuminates 71 in the small readout at the top of the box.

Circle 71 is located in map grid I-10. From the intersection of 56<sup>th</sup> St. and Dynamite Blvd., proceed south on 56<sup>th</sup> St. for 0.6 miles. Turn right onto the dirt road that runs along the west side of the transmission lines. Proceed northwest 0.2 miles to the first transmission line tower on the right. At this clue site you notice a poster of a puzzled T. Hunter looking up at the cactus. Looking up yourself, you find an inaccessible clue ring high above you in a saguaro. As you stand there looking up at the clue ring, you realize that you are in fact re-creating the logo/clue book cover from a past hunt. Recognizing the scene from the historic Clue Book cover in the Brown Bag, you determine the missing year by locating the same logo on your own T-shirt from this year’s. This was the logo for The Hunt of 1991. So,

head over to Circle 91 .

Circle 91 is located in map grid E-12. From the intersection of Cave Creek Road and Pinnacle Peak Road, proceed northeast on Cave Creek for 0.6 miles to the entrance of a City of Phoenix Booster Pump Station. Turn east and proceed 200 feet to the station. The clue site is located at the southeast corner of the walled compound beside a small creosote bush.

Three Wizards

Three Golden Wizards, Harry, Larry, and Jerry, served their Committee terms well. During their last year of dedicated service, they each filled one of the illustrious positions as Sage, Treasurer, and Banquet Boss, but not necessarily respectively. The following four statements were made about these fine men; however, only ONE of the statements is actually true:

1. Harry was not the Banquet Boss.
2. Larry was not the Treasurer.
3. Harry was the Treasurer.
4. Larry was not the Banquet Boss.

Who was the Sage that year?

**IF YOU ARE UNABLE TO SOLVE THIS CLUE OR FIND CLUE T, OPEN EMERGENCY ENVELOPE 22, WHICH WILL DIRECT YOU TO CLUE T.**

**THIS IS EMERGENCY SOLUTION 22, WHICH WILL LEAD YOU TO CLUE T.**

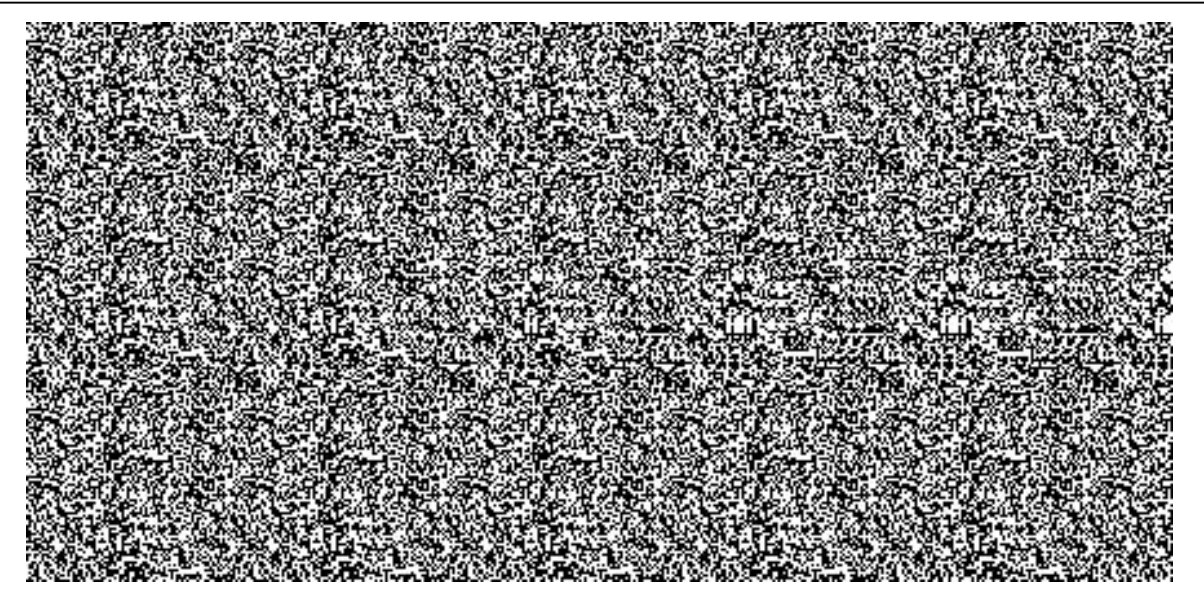

Given the condition that only one statement is true, you realize that either the first or fourth statement must be the true one, since they both cannot be false (i.e. both men could not be Banquet Boss the same year). Therefore, the second and third statements must be false also. This means Larry was the Treasurer. From this, the fourth statement must be true and the first statement must be false. So Harry was the Banquet Boss leaving Jerry as the venerable Sage.

So go to Circle .

Circle  is located in map grid D-15. From the intersection of 16<sup>th</sup> St. and State Route 101, proceed south on 16<sup>th</sup> St. for 0.4 miles to Sequoia Drive. The clue site is located 42 feet south of Sequoia and 205 feet east of 16<sup>th</sup> St. behind a palo verde tree.

What can you make in all of the random dots? HWOW helps here with “ii. Stereograms are random .....”.

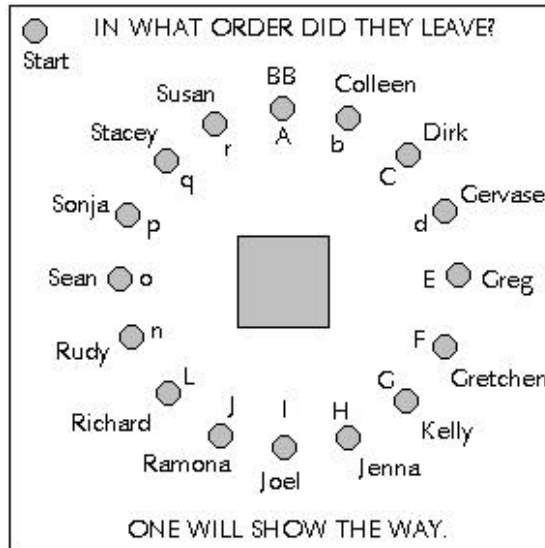

Hopefully, you recognized this as a random dot stereogram. By focusing your eyes beyond the plane of the paper, a three-dimensional image will appear. The hidden word you should see is C O M. Of course,

these days dots are always paired with coms as in “dot.com”. Head over to Circle  in IPO Wash off of E-Commerce Drive.

Circle  is located in map grid B-11. From the intersection of Central Ave. and Happy Valley Road, proceed north on Central for 0.4 miles to a small dirt wash. The clue site is located 248 feet southwest of Central, down the center of the wash, next to a palo verde tree.

The Hints Wise and Otherwise reference to “Anyone who finishes is a survivor” should have had your team studying the Survivor show. If you did, you learned the order of the survivors leaving the island: Sonja, BB, Stacey, Ramona, Dirk, Joel, Gretchen, Greg, Jenna, Gervase, Colleen, Sean, Susan, Rudy, Kelly, and Richard.

Once you enter the sequence correctly, you saw the letter “H” light up in the center of the clue. “H” corresponds to Jenna. So head to Circle  for your next team challenge.

Circle  is located in map grid D-13. From the intersection of 7<sup>th</sup> St. and Deer Valley Road, proceed east on Deer Valley for 0.75 miles to a large pullout on the south side of the road. This is the point where Deer Valley starts to curve to the north at a speed limit sign located on the south side of the road. The clue site is located 222 feet south of the speed limit sign between a palo verde tree and a saguaro cactus.

# **TREASURE HUNT**

## **\*\*\*\*\*HALL OF FAME\*\*\*\*\***

### Pro Button Winners Section

Beginning in 1970, all one-time winners who have had less than three years of respite from committee service and all two-time winners with six years of committee service, have been offered the opportunity to declare their cars "professional". This declaration must be made upon application for tickets to the hunt. In 1981, the 1970 resolution was amended to limit those teams wishing to declare themselves "professional" to those having three or more qualifying members under the 1970 resolution.

The Treasure Hunt Committee employs the following interpretations of these resolutions.

Professional teams agree not to compete against amateur teams in the hunt. First, second, and third place prizes will be awarded to the three amateur teams with the lowest times per clue. If a professional team has the lowest time per clue for the hunt, the team will be added to the "Pro Button Winners" section of the Hall of Fame. Those team members whose status qualified the team for professional competition will be awarded "Pro" buttons to be affixed to their previously won red hats. All Pro teams having times per clue better than the third place winners will be identified for their commendable performances, while those pro teams which placed closer to the other end of the pack will also receive some "special" recognition.

Teams that are eligible to do so, but for whatever reason do not declare "professional status" for the hunt, will compete as amateur teams, eligible for the first, second and third place prizes.
